

Botany Museum

The Departmental Museum of the Botany Department at Rajiv Gandhi Government College, Chaura Maidan, is a modern facility designed to complement academic learning with practical, hands-on experience in Plant Sciences. It serves as an educational resource, showcasing an extensive and meticulously curated collection of 250 plant specimens including cold desert medicinal plants, spices, and botanical models that highlight the diversity and complexity of the plant kingdom.

The museum houses a variety of preserved specimens, including algae, fungi, bryophytes, pteridophytes, gymnosperms, and angiosperms, representing the full spectrum of plant life. The collection also includes herbarium sheets, which document regional and rare flora, providing invaluable insights into plant taxonomy and biodiversity. By offering a dynamic and comprehensive learning environment, the Departmental Museum plays a critical role in fostering curiosity, enhancing understanding, and inspiring research in the field of botany and life sciences.
